# SILASIL ENERGY.SG

**ALSO KNOWN AS: THE MULTITASKER**

**PROFILE:**

- **Rapidly lowers pH** by formation of lactic acid
- **Inhibits clostridia and prevents butyric fermentation**  
→ stable ensiling process
- **Inhibits yeasts by efficient formation of acetic acid**  
→ maximum protection against heating at feed-out and energy losses

**STRENGTHS:**

**Simultaneous protection** against butyric fermentation and heating at feed-out

**FEEDSTOCKS:**

Grass silage from minimum 25 % DM  
wilted clover grass, lucerne and green rye silage from minimum 30 % DM

**SILAGE MATURATION TIME:** min. 60 days

**SUGAR CONTENT:** low <4 Brix to medium 4–7 Brix
